**“CYTOKINES AND TUMOR MARKERS:
A BIRD’S EYE VIEW”**

It gives us immense pleasure to invite you to the CME on **“CYTOKINES AND TUMOR MARKERS: A bird’s eye view”**. Cytokines play a major role in health and disease. They have been implicated right from embryogenesis to respiratory diseases, inflammatory bowel disease and also in diseases that plague the twilight years of mankind like Alzheimers, Schizophrenia and Cancer. Updation of our knowledge regarding them is the need of the hour.

Tumor markers are nevertheless equally important in diagnosing benign as well as malignant growths. They are important diagnostic weapons in the clinician’s armamentarium. Judicious use of these weapons empower the clinician to zero on to the diagnosis and to treat effectively. This CME is a joint venture by the Department of Biochemistry & Oncology, KAMSRC, L.B. Nagar.

Looking forward to see you all
